

**speedheater<sup>®</sup> System**

Removes paint - with warmth

**NEW!**

## Speedheater 1100 RS "Half as wide - twice as fast"

With the Speedheater 1100 RS, you can cut the time it takes to remove putty and paint in half, as compared to the Speedheater 1100 S multi-function tool. According to many glaziers, the tool can do the job of both a putty saw and a putty mill-cutter.
